Fresh new reasons to join the

touché
Dedicated to Food Service

revolution.

01

Caters to the needs of all varieties of F&B business, including but not limited to, seated dining, quick service, home delivery, event venues, membership clubs and institutional catering.

BENEFIT

The chain does not have to deal with the frustrations of dealing with and integrating multi-vendor systems.

02

Offers the optimum mix of technologies... in-property guest facing systems and cloud based back office system.

BENEFIT

A mix that ensures quick & reliable transaction processing at operating units while optimising investment in back office IT infrastructure.

03

Integrates the enterprise, enabling data to be shared between concerned units & departments, instantly and accurately.

BENEFIT

Eliminates silos of information resulting in better inter-departmental coordination and a more efficient enterprise.

04

Provides central control and visibility over enterprise data.

BENEFIT

Results in greater standardization of processes, optimum use of scarce skilled manpower and useable business analytics.

05

Is not just a promise, but, a proven solution that is already in use and can be trusted.

BENEFIT

The least risky decision that you can take. A solution that protects your interests and provides tangible return on investment.

Beyond traditional data processing...

What our clients are

SAYING

about us

Having a software development team that understands hospitality also played a major part in getting the solution correct the first time. I am delighted with the return on investment that Bombay Palace has achieved from the Touché solution. I think it's sufficient to say that this solution would not have been so successful had we not had this partnership approach to this challenge.

Raj | General Manager
Bombay Palace
